ABOUT THE ARTIST:

Camilla Eustance is a Melbourne based writer, illustrator and artist. Camilla's work has been published in various online and print publications. She has had commissions from clients such as The University of Melbourne, Vanity Projects and RedSea Pictures. She has exhibited in multiple spaces and is curating and exhibiting in a show at NOIR Darkroom this year. Using bright colours and shapes, her multimedia work expresses elements of the everyday, of psychology, and the often amusing quandaries of being human.

ABOUT THE DESIGN:

The artist's design investigates the connection that humans and other creatures have with the world around them. It merges the phenomenology of the Victorian forest with that of the urban street; and the community that interacts with each other on the street. The design aims to promote wellness and connection with nature and family, and our community.
